DETAILED ACTION

This action is responsive to the paper(s) filed 4/30/08.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 2-3, 11-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claims 2-3, 11-12, because these claims set forth a data table and three “units” and because the “units” are not positively set forth as computer programmed apparatuses or storage mediums with programming code embodied on them, these claims can then be broadly interpreted to represent programming per se. While the claimed programming is taken to represent “functional” descriptive material, it represents nonstatutory “programming per se” 33 F.3d at 1360, 31 USPQ2d at 1759. When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory. Applicant should put the programming on a computer readable medium to overcome the 101 rejection. See MPEP 2106.01.

Applicant should specify that each of the three units is either a computer programmed apparatuses capable of performing the recited functions or a storage medium with programming code embodied on them capable of performing the recited functions. As it stands, a “unit” capable of xyz can be interpreted as mere sections of code listings.

Allowable Subject Matter

Claims 1-3, 6-12, 15, 16 appear to contain allowable subject matter.
